

Attainment Monitoring

Service Description

The Welfare Call Group, established in 2002, are acknowledged leaders in developing and providing secure, cloud-based platforms for the collection and analysis of vulnerable groups which include, but are not limited to, Looked After Children, Youth Offenders, Children at risk of Sexual Exploitation and Children Missing Education. This knowledge and expertise has been proven to assist our clients obtain and improve outcomes for these vulnerable groups of children. The reporting and standards of critical information enhances the safeguarding of these children and young adults.

We were the first in the market to develop a suite of dedicated, secure Looked After Children cloud-based systems to streamline delivery of these services. These proprietary systems are continuously developed and fine-tuned over time. **We are the only provider that offers integrated attendance monitoring, attainment tracking and ePEP systems on a shared platform.**

Service Overview

We are increasingly being asked to collect attainment data for the children whom we monitor on behalf of the Authorities and are now able to collect:

- Examination results
- Termly teacher assessments
- Other specialist areas e.g. phonics

This data collection process is achieved through a number of different methods. We have recently developed what is known as the schools portal which allows a specific person from the education provision of the child to log into a secure website to disclose the results which the child has gained. In addition to this we will also request the results via email and phone calls from the provisions if the results have not been submitted through the schools portal. We currently make a minimum of 4 attempts to gain the results, but for the Spring Term have made up to 7

requests for the information in most cases, which has translated into a response rate of over 90%.
